Absolutely! Our Board and senior leadership is meeting early September to talk about the strategic direction of the company and allocation of capital for 2014 and beyond. This shows that our landfill diversion efforts are solid and worth pursuing. Being able to give Philadelphia the recycling and landfill diversion services they want is huge in terms of how the municipal market may decide to move away from the cheaper landfill option in the future.

So it was a wait, but -- unknown to you -- it came just in time to support the leaders in the company who feel that we have to find "zero waste" options and not retreat to the simpler, old "collect and dispose" model.

As I reflect on it, I'm glad everyone in the three offices gave our proposal such an exhaustive review. Because the evaluation was so intense and detailed, we have this strong, independent ratification that we've thought this through thoroughly and meet all of the Agency's environmental standards. Everyone is really excited, and energized about what we can do.

Thanks again!
Sue

We were so thrilled to get the “comfort letter” today for SpecFUEL. The product is a critical part of WM’s hope to be able to supply the more sustainable materials management services we know EPA would like to see.

I particularly appreciate both of your efforts to see the evaluation through to a conclusion. I know the Agency has a pretty crushing workload, so it’s always an honor to be able to get the time needed to address a process this complex.

Have a wonderful weekend, and thank you so much!
Sue
